Politics, Markets, and America's Schools John E. Chubb 2011-09-01 During the 1980s, widespread dissatisfaction with America's schools gave rise to a powerful movement for educational change, and the nation's political institutions responded with aggressive reforms. Chubb and Moe argue that these reforms are destined to fail because they do not get to the root of the problem. The fundamental causes of poor academic performance, they claim, are not to be found in the schools, but rather in the institutions of direct democratic control by which the schools have traditionally been governed.

Reformers fail to solve the problem-when the institutions ARE the problem. The authors recommend a new system of public education, built around parent-student choice and school competition, that would promote school autonomy—thus providing a firm foundation for genuine school improvement and superior student achievement.

The Wahls Protocol Terry Wahls M.D. 2014-03-13 An integrative approach to healing chronic autoimmune conditions by a doctor, researcher, and sufferer of progressive multiple sclerosis (MS) whose TEDx talk is already a web sensation Like many physicians, Dr. Terry Wahls focused on treating her patients' ailments with drugs or surgical procedures—until she was diagnosed with multiple sclerosis (MS) in 2000. Within three years, her back and stomach muscles had weakened to the point where she needed a tilt-recline wheelchair. Conventional medical treatments were failing her, and she feared that she would be bedridden for the rest of her life. Dr. Wahls began

studying the latest research on autoimmune disease and brain biology, and decided to get her vitamins, minerals, antioxidants, and essential fatty acids from the food she ate rather than pills and supplements. Dr. Wahl's adopted the nutrient-rich paleo diet, gradually refining and integrating it into a regimen of neuromuscular stimulation. First, she walked slowly, then steadily, and then she biked eighteen miles in a single day. In November 2011, Dr. Wahls shared her remarkable recovery in a TEDx talk that immediately went viral. Now, in *The Wahls Protocol*, she shares the details of the protocol that allowed her to reverse many of her symptoms, get back to her life, and embark on a new mission: to share the Wahls Protocol with others suffering from the ravages of multiple sclerosis and other autoimmune conditions.

Quattro Jeremy Walton 2020-09-15 The word 'Quattro', chosen by Audi for its pioneering high-performance four-wheel-drive cars, immediately captures glamour and excitement in the minds of all motorsport enthusiasts. This book, written by a leading journalist and Quattro devotee, explores 24 years of factory-prepared and factory-supported Quattros in motorsport, from 1980 to 2004. It is a tale that extends from rough rally stages to race tracks, from pine-fringed ice trails in the depths of European winters to the shimmering heat haze and melting asphalt of Texas street racing. Along

the way, it explains how Quattros collected four world rally championships, five American driver/manufacturer crowns and a single-year haul of seven international touring car titles, plus numerous other honours. With the five-cylinder turbocharged Quattro in its original form, rallying in the early years yielded numerous wins, most of all in 1982, when seven victories in 11 world championship rallies brought the first title. With the short-wheelbase Sport added to Audi's armoury, 1984 became an all-action, all-conquering rallying season with two more world titles won, for drivers (Stig Blomqvist) and manufacturers. Three stunning Pike's Peak wins were achieved in America in successive years, for Michele Mouton (1985), Bobby Unser (1986) and Walter Röhrl (1987). Starting with double championships for the 200 quattro in TransAm (1988) and the 90 Quattro in IMSA (1989), racing success unfolded in America. Exuberant Hans Stuck was the star driver, but consistent team-mate Hurley Haywood captured that 1988 title. Touring car campaigns during the 1990s brought huge success, starting with fearsome V8 Quattro 'racing limos' in Germany. Global achievements followed with A4 Quattros in many national Super Touring series throughout Europe and in Australia, including Frank Biela's 1996 title-winning campaign in Britain. Audi continued to win on track in the new millennium as race versions of the S4 and RS6 captured five SCCA GT Championship titles in America.

Factory 19 Dennis Glover 2020-11-03 We're told that the future will be brighter. But what if human happiness really lies in the past? Hobart, 2022: a city with a declining population, in the grip of a dark recession. A rusty ship sails into the harbour and

begins to unload its cargo on the site of the once famous but now abandoned Gallery of Future Art, known to the world as GoFA. One day the city's residents are awoken by a high-pitched sound no one has heard for two generations: a factory whistle. GoFA's owner, world-famous billionaire Dundas Faussett, is creating his most ambitious installation yet. He's going to defeat technology's dominance over our lives by establishing a new Year Zero: 1948. Those whose jobs have been destroyed by Amazon and Uber and Airbnb are invited to fight back in the only way that can possibly succeed: by living as if the internet had never been invented. The hold of Bezos, Musk, Zuckerberg and their ilk starts to loosen as the revolutionary example of Factory 19 spreads. Can nostalgia really defeat the future? Can the little people win back the world? We are about to find out. 'Like Orwell, of whom he has written so brilliantly, Dennis Glover's work is charged with courage, intelligence and purpose. He is the complete writer, and one made for our times.' —Don Watson 'Savagely hilarious and unlike anything else you'll read this year. It boils with the anger of the present moment.' —Rohan Wilson

The Yugo Jason Vuic 2011-03-01 Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans

that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.
