The Stylus and the Scalpel Tommaso Gazzarri 2020-09-21 Seneca's developed metaphors draw on what is known to describe the unknown. They put hard ethical in highly accessible, and often quite entertaining, terms. The present book provides a functional description of Seneca's dialectical relation between metaphorical language and philosophy. It shows how Stoic philosophy finds a new means of expression in Seneca's highly elaborated rhetorical discourse, and how this relates to the social and cultural demands of Neronian culture. Metaphors are purposely utilized to work "collectively" rather than by category or type and that, therefore, the analysis of what metaphors do when Seneca chooses to combine them in clusters, demonstrates the existence of a "metanarrative of rhetoric". This approach is fundamentally innovative and has the advantage of gauging the functioning of Senecan style as a whole, rather than focusing on single features of its rhetorical functioning. The main target is to show how philosophical preaching materially contributes to the healing of human soul because it shapes the individual's cognitive faculty in a way that is physical and not simply figurative. The stylus and the scalpel blend in their functions. This kind of therapy is not just the simulacrum of a more "real" one, it is in itself medical in nature.

Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. Financial Innovation and Resilience Lilia Costabile 2018-09-28 As Ignazio Visco, Governor of the Bank of Italy, says in his Foreword, all

economic policy makers today need to re-examine our history to help them confront the challenges of today. This edited volume focuses specifically on the theme of financial innovation and how financial resiliency was achieved in Naples. To highlight both the achievements of the public banks of Naples and their lessons for financial resiliency, the book focuses on financial crises and how they were overcome in Naples in contrast to other European financial systems. The first section focuses on the development of the public banks unique to Naples. The second section compares those with other banking systems and how they responded to the same shock in 1622, caused by the full mobilization of European belligerents to finance their efforts in the Thirty Years War. The next section compares lessons learned in the rest of Europe over the next century and a half. The final section comes back to original start of the narrative arc to suggest ways that today's policymakers and thinkers could use the historical experience of the public banks of Naples to deal better with the ongoing problems stemming from the financial crisis of 2007-08.

The Philosophy of Money Georg Simmel 2004-08-02 'I have lost interest ...in all that I have written prior to The Philosophy of Money . This one is really my book, the others appear to me colourless and seem as if they could have been written by anyone else.' - Georg Simmel to Heinrich Rickert (1904) In The Philosophy of Money , Simmel provides us with a remarkably wide-ranging discussion of the social, psychological and philosophical aspects of the money economy, full of brilliant insights into the forms that social relationships take. He analyzes the relationships of money to exchange, the human personality, the position of women, individual freedom and many other areas of human existence. Later he provides us with an account of the consequences of the modern money economy and the division of labour, which examines the processes of alienation and reification in work, urban life and elsewhere. Perhaps, more than any of his other sociological works, The Philosophy of Money gives us an example of his comprehensive analysis of the interrelationships between the most diverse and seemingly connected social phenomena. This revised edition of the translation by Tom Bottomore and David Frisby, includes a new Preface by Davi

A Line in the Snow Michael Farrar 2009-10 Most Americans had never heard of the Arctic National Wildlife Refuge (ANWR) before the summer of 2008 when gas prices exceeded \$4.00 per gallon. At that time a national cry rang out for relief at the pumps and for increased energy security to prevent such a painful recurrence. ANWR suddenly became a highly contentious issue in the energy debated raging in Congress, eventually spilling over into the presidential campaigns throughout the fall. It was front page news as Congressional delegations and media outlets made the obligatory pilgrimage to Anchorage and points beyond in a half-hearted effort to find truth amid the mounting hype. Yet what was learned from all this activity? What do any of us really know about ANWR that wasn't gleaned from thirty-second news bite? The sad truth is that most Americans had never seen, and never will see, the remote majestic corner of northern Alaska. Regrettably, there is no manual with respect to comprehending the issues surrounding ANWR. Current sources run a somewhat limited spectrum from addressing narrow topics in total isolation, to being only mildly informative. More importantly, the information, whether it is derived from energy advocates, environmental organizations, or political analysts, tends to harbor an innate bias. This book is a good faith effort to inform, without bias.

Tom Hartley Tom Hartley 2021-03-16 The car world is full of fascinating characters, but few have a story to tell quite as remarkable and

inspirational as Tom Hartley. Walking out of school at the age of 11, unable to read or write, Hartley set up his own business buying and selling cars. From that moment, he defied logic and ripped up the rule book on his way to the top. Today he runs one of the most successful independent family run performance and luxury car businesses in the world. He has built up an unrivalled reputation as "The Dealmaker." Tom has been at the top for over 40 years, survived and thrived through four recessions, and overcome three life threatening illnesses. In his own brutally honest words, Hartley tells his gripping story of a boy from a traditional Romany family who swapped the classroom for the cut-throat world of Glasgow's car auctions, buying and selling his first car at the age of 12. Having decided to drive himself around illegally, he was only 15 when he had his first car crash, and they don't come more spectacular than writing off a Ferrari Dino - nothing has ever been normal in the world of Tom Hartley! Hartley had made his first million by the age of 17, but soon suffered major setbacks as his business went bust, and he found himself at risk of losing his sight without major surgery. Hartley started all over again, living in a mobile home with his wife and working from the back of a car. He had gone from hero to zero, but his burning desire to be the best saw him climb his way back to the top. His ability to clinch deals in some of the most bizarre places has become legendary, like buying a car in a sauna, while stuck in a traffic jam on a motorway, and even in a swimming pool! Family has played a key part in the Tom Hartley story, his wife has been at his side all the way, and his two sons have followed closely in their father's footsteps. Indeed Tom's belief in family is one of the inspiring messages that comes through. Hartley's inspirational story is about the unshakeable belief in his own abilities, from a precocious schoolboy who had a dream, and then through sheer hard work and a burning desire to make the dream come true. This is not just a book for car enthusiasts but for anyone who has dared to dream. It's a story that will inspire and motivate, and proves you can make the wildest dream come true if you want it badly enough. Tom's remarkable story is written with the collaboration of journalist Ken Gibson, for 24 years, award-winning Motoring Editor of The Sun newspaper.
