Addressing Challenging Moments in Psychotherapy Jerome S. Gans 2021-09-30 "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy, treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, Challenging Moments in Psychotherapy is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

Personalized Learning in Gifted Education Todd Kettler 2022-02-16 Gifted students can exhibit extreme variance in both their abilities and their interests, yet they are often treated within schools as one homogeneous, specialized population. Personalized Learning in Gifted Education helps educators strengthen their differentiation of both instruction and services for advanced students. This book: • helps educators develop the specific gifts and talents of the gifted students they serve • includes a year-long plan for professional learning communities seeking to transform their programs • demonstrates how educators can utilize the wealth of data they have at their disposal • provides a rationale and blueprint for a stronger, more personalized approach to gifted education • offers suggestions for both elementary and secondary schools. Recommendations center around five features of personalized learning: personalized learning plans, project- or problem- based learning, competency-based progression through the curriculum, criterion-referenced assessments, and multi-year mentoring.
