Overview of Computer Literacy Skills - Harper College

Keyboard Skills The keyboard is used to type information into the computer or input information. A typical personal computer (PC) keyboard has the keys organized into four separate areas: the Function keys, the Typewriter keys, Cursor Control keys, and the Numeric keypad. The most common keyboard layout is the QWERTY keyboard seen below in Figure 2. It is

MAIN IDEAS - Miami Dade College

2. The fact that electronic computers are now used for data processing has led the general public to believe that it is a mysterious, complicated science and that the computers are giant brains. Both of these ideas are false. A computer is basically just a high-speed adding machine that performs the functions it is told to.

The Care of Your Parish Records - Church of England

between a number of computers. It is also advisable for parishes to ensure that compatibility of existing data is addressed when buying and installing new computer systems. Otherwise significant re-keying or loss of data may occur. Many parishes now maintain web sites. If the technical expertise is available it is of value to take a snapshot
