clients, trainees, and research par-ticipants and to minimize or to remedy unavoidable or unanticipated harm. A.1.d. Support Network Involvement Counselors recognize that support networks hold various meanings in the lives of clients and consider en-listing the support, understanding, and involvement of others (e.g., reli-

<u>Crisis Intervention: An Opportunity to Change</u>
Crisis intervention involves three components: 1) the crisis, the perception of an unmanageable situation; 2) the individual or group in crisis; and 3) the helper, or mental health worker who provides aid. Crisis intervention re-quires that the person experiencing crisis receive timely and skillful support to help cope with his/her situation

The Five Year Forward View for Mental Health - NHS England
people with schizophrenia in hospital received the recommended assessment of cardiovascular risk in the previous 12 months. In addition, people with long term physical illnesses suffer more complications if they also develop mental health problems, increasing the cost of care by an average of 45 per cent. Yet much of the time this goes unaddressed.
