Marriage, Law and Modernity Julia Moses 2017-11-16 Marriage, Law and Modernity offers a global perspective on the modern history of marriage. Widespread recent debate has focused on the changing nature of families, characterized by both the rise of unmarried cohabitation and the legalization of same-sex marriage. However, historical understanding of these developments remains limited. How has marriage come to be the target of national legislation? Are recent policies on same-sex marriage part of a broader transformation? And, has marriage come to be similar across the globe despite claims about national, cultural and religious difference? This collection brings together scholars from across the world in order to offer a global perspective on the history of marriage. It unites legal, political and social history, and seeks to draw out commonalities and differences by exploring connections through empire, international law and international migration.

Property and Civil Society in South-Western Germany 1820-1914 Jonathan Sperber 2005-09-22 Historians have often employed the concept of civil society, an intermediary realm between the family and the state, to analyse nineteenth-century Europe and North America. They have concentrated on voluntary associations, the press and public meetings, the

constituent elements of Jürgen Habermas's 'public sphere', in doing so overlooking a central element of nineteenth-century civil society: property and its disposition, whether within the family or in the marketplace. This book examines the place of property in the society of south-western Germany during property's nineteenth-century golden age. It analyses the culture of property ownership and property transactions within families, among business partners and competitors, and among creditors and debtors. The work considers the boundaries of property, outlining relationships between neighbouring property owners, and showing how property ownership helped shape social distinctions between men and women, Christians and Jews, the upper and lower classes, the sane and the insane, and between honourable and dishonourable actions. It traces the development of property relations and property transactions from the end of the Napoleonic era to the eve of the First World War. The book's conclusion compares conditions in south-western Germany with those elsewhere in Europe and North America, and considers changes in property relations occurring in Germany during the age of total war and in the post-1945 period in the light of structures and developments in the nineteenth century. Based on extensive documentation from civil court records, *Property and Civil Society in South-Western Germany* presents its results through the recounting of intriguing, sometimes bizarre, but always revealing stories of legal disputes. A reconsideration of the nature of civil society, an analysis of nineteenth-century social development and social conflict, a study of the nature and action of the law in everyday life, the book is also an ironic and bemused look at the past human condition.

Gender Justice David Kirp 1986-12-01 Examines how laws and government policies concerning sexual equality are formulated, looks at how sex roles have changed, and discusses the proper aims of public policy

Because of Eve Joseph E. Early, Jr. 2022-10-15 *Because of Eve* is a thorough examination of how the Church and Christian men sought to define women and the roles women must play within the church, home, and society for more than two thousand years. The book examines the works of theologians, decrees of councils, canon law, statements of faith, and a myriad of other pronouncements that affected their generation--and the following generation's--beliefs concerning women. Each chapter considers the era in which these beliefs were voiced, as much of what was accepted as orthodoxy was reflected in or based on cultural beliefs. **WORDS OF PRAISE** This important study surveys the roles of women, roles often assigned to them by men, through both biblical testaments and across Christian history to the contemporary church. It is a significant research resource for understanding historical, theological, spiritual and cultural interactions between males and females and the religious dogmas that influenced and divided them. ---Bill J. Leonard, Emeritus Professor of Divinity, Wake Forest University Joseph Early has meticulously researched the primary sources throughout the history of the Church to show definitively how men, for their own purposes, have used the Bible to categorize and define women.

Early then goes further to show how these erroneous and unbiblical beliefs are reflected and amplified in some modern-day theologies and practices. As an observer of this six-year long research project, I can attest to the author's innate dedication and fidelity to the task of showing how God's word is not detrimental to women but instead uplifts them as co-heirs with Christ and indeed, on equal ground with their brothers in Christ. --Twyla K. Hernández, Professor of Missions, Campbellsville University

Joseph Early's *Because of Eve: Historical and Theological Survey of the Subjugation of Women in the Christian Tradition* is an incredibly useful compendium of Christian men's beliefs about women across church history. With careful detail and ample primary source evidence, Early demonstrates how for most of church history, men have offered biblical interpretations and constructed misogynistic theologies that maintain and reproduce the subordination of women. This volume will be helpful for academics and general readers alike for its comprehensive documentation of the treatment of women in men's thinking and writing from biblical times until the present. ---Susan M. Shaw, Professor of Women, Gender, and Sexuality Studies, Oregon State University

Masculine Power and Gender Equality: Masculinities as Change Agents Russell Luyt 2020-03-03 This book explores how political institutions can challenge dominant and normative masculinities, guiding thinking instead toward a transformation of gendered power structures and general equality. Representing a range of relevant areas, the expert chapter authors provide various methodological and theoretical approaches applied to shifting gender meanings in cultural, national, and social contexts. Authors also represent a variety of cultures, contributing to the multi-perspective debate about how best to achieve gender equality in the real world. Among the topics discussed: Reimagining masculinities, their everyday practice and practical interventions Towards a feminist theory of male rape Political implications of challenging men's everyday practices through domestic violence primary prevention work Men as allies: a case study of White Ribbon Australia

Masculine Power and Gender Equality: Masculinities as Change Agents provides valuable insight into strategies for re-imagining male-dominated power structures and promoting gender equality.

Pragmatism and Feminism Charlene Haddock Seigfried 1996-06-15 Though many pioneering feminists were deeply influenced by American pragmatism, their contemporary followers have generally ignored that tradition because of its marginalization by a philosophical mainstream intent on neutral analyses devoid of subjectivity. In this revealing work, Charlene Haddock Seigfried effectively reunites two major social and philosophical movements, arguing that pragmatism, because of its focus on the emancipatory potential of everyday experiences, offers feminism its most viable and powerful philosophical foundation. With careful attention to their interwoven histories and contemporary concerns, *Pragmatism and Feminism* effectively invigorates both traditions, opening them to new interpretations and appropriations and asserting their timely philosophical relevance. This foundational work in feminist theory simultaneously invites and guides future

scholarship in an area of rapidly emerging significance.

Toward a Feminist Ethics of Nonviolence Adriana Cavarero 2021-01-26 *Toward a Feminist Ethics of Nonviolence* brings together major feminist thinkers to debate Cavarero's call for a postural ethics of nonviolence and a sociality rooted in bodily interdependence. *Toward a Feminist Ethics of Nonviolence* brings together three major feminist thinkers—Adriana Cavarero, Judith Butler, and Bonnie Honig—to debate Cavarero's call for a postural ethics of nonviolence. The book consists of three longer essays by Cavarero, Butler, and Honig, followed by shorter responses by a range of scholars that widen the dialogue, drawing on post-Marxism, Italian feminism, queer theory, and lesbian and gay politics. Together, the authors contest the boundaries of their common project for a pluralistic, heterogeneous, but urgent feminist ethics of nonviolence.

Civil Society and Gender Justice Karen Hagemann 2008-10-01 Civil society and civic engagement have increasingly become topics of discussion at the national and international level. The editors of this volume ask, does the concept of "civil society" include gender equality and gender justice? Or, to frame the question differently, is civil society a feminist concept? Conversely, does feminism need the concept of civil society? This important volume offers both a revised gendered history of civil society and a program for making it more egalitarian in the future. An interdisciplinary group of internationally known authors investigates the relationship between public and private in the discourses and practices of civil societies; the significance of the family for the project of civil society; the relation between civil society, the state, and different forms of citizenship; and the complex connection between civil society, gendered forms of protest and nongovernmental movements. While often critical of historical instantiations of civil society, all the authors nonetheless take seriously the potential inherent in civil society, particularly as it comes to influence global politics. They demand, however, an expansion of both the concept and project of civil society in order to make its political opportunities available to all.

Gendering Citizenship in Western Europe Ruth Lister 2007 "This is a collectively written, interdisciplinary, thematic cross-national study, which combines conceptual, theoretical, empirical and policy material in an ambitious and innovative way to explore a key concept in contemporary European political, policy and academic debates." "The book is unusual in weaving together the topics of migration and childcare and in studying these issues together within a gendered citizenship framework. It also demonstrates the value of a multi-level conceptualisation of citizenship, stretching from the domestic sphere through the national and European levels to the global." "The book is aimed at students of social policy, sociology, European studies, women's studies and politics and at researchers/scholars/policy analysts in the areas of citizenship,

gender, welfare states and migration."--BOOK JACKET.

Women's Activism, Feminism, and Social Justice Margaret A. McLaren 2019 A wide range of issues besieges women globally, including economic exploitation, sexist oppression, racial, ethnic, and caste oppression, and cultural imperialism. This book builds a feminist social justice framework from practices of women's activism in India to understand and work to overcome these injustices. The feminist social justice framework provides an alternative to mainstream philosophical frameworks that promote global gender justice: for example, universal human rights, economic projects such as microfinance, and cosmopolitanism. McLaren demonstrates that these frameworks are bound by a commitment to individualism and an abstract sense of universalism that belies their root neo-liberalism. Arguing that these frameworks emphasize individualism over interdependence, similarity over diversity, and individual success over collective capacity, McLaren draws on the work of Rabindranath Tagore to develop the concept of relational cosmopolitanism. Relational cosmopolitanism prioritizes our connections while, crucially, acknowledging the reality of power differences. Extending Iris Young's theory of political responsibility, McLaren shows how Fair Trade connects to the economic solidarity movement. The Self-Employed Women's Association and MarketPlace India empower women through access to livelihoods as well as fostering leadership capabilities that allow them to challenge structural injustice through political and social activism. Their struggles to resist economic exploitation and gender oppression through collective action show the vital importance of challenging individualist approaches to achieving gender justice. The book is a rallying call for a shift in our thinking and practice towards re-imagining the possibilities for justice from a relational framework, from independence to interdependence, from identity to intersectionality, and from interest to socio-political imagination.

The Oxford Handbook of Political Theory John S Dryzek 2008-06-12 Long recognized as one of the main branches of political science, political theory has in recent years burgeoned in many different directions. Close textual analysis of historical texts sits alongside more analytical work on the nature and normative grounds of political values. Continental and post-modern influences jostle with ones from economics, history, sociology, and the law. Feminist concerns with embodiment make us look at old problems in new ways, and challenges of new technologies open whole new vistas for

political theory. This Handbook provides comprehensive and critical coverage of the lively and contested field of political theory, and will help set the agenda for the field for years to come. Forty-five chapters by distinguished political theorists look at the state of the field, where it has been in the recent past, and where it is likely to go in future. They examine political theory's edges as well as its core, the globalizing context of the field, and the challenges presented by social, economic, and technological changes.

Toward a Feminist Theory of the State Catharine A. MacKinnon 1989 This book presents MacKinnon's powerful analysis of politics, sexuality, and the law from the perspective of women. Using the debate over Marxism and feminism as a point of departure, MacKinnon develops a theory of gender centered on sexual subordination and applies it to the state.

Women's Emancipation Movements in the Nineteenth Century Sylvia Paletschek 2005-11-14 The nineteenth century, a time of far-reaching cultural, political, and socio-economic transformation in Europe, brought about fundamental changes in the role of women. Women achieved this by fighting for their rights in the legal, economic, and political spheres. In the various parts of Europe, this process went forward at a different pace and followed different patterns. Most historical research up to now has ignored this diversity, preferring to focus on women's emancipation movements in major western European countries such as Britain and France. The present volume provides a broader context to the movement by including countries both large and small from all regions of Europe. Fourteen historians, all of them specialists in women's history, examine the origins and development of women's emancipation movements in their respective areas of expertise. By exploring the cultural and political diversity of nineteenth-century Europe and at the same time pointing out connections to questions explored by conventional scholarship, the essays shed new light on common developments and problems.

The German League for the Prevention of Women's Emancipation Diane J. Guido 2010 "The German League for the Prevention of Women's Emancipation: Antifeminism in Germany, 1912-1920 presents a detailed account of the activities of the German League for the Prevention of Women's Emancipation from its beginnings in 1912 to its dissolution in 1920. It underscores the impact of this conservative, keenly nationalist, and increasingly anti-socialist, anti-Semitic and anti-Catholic organization as it targeted primarily the moderate bourgeois Federation of German Women's Associations and the conservative German-Evangelical Women's League. This book also documents motives for membership, the League's philosophy, and the political and social activism used by the League to achieve its aims. Based on a membership list reconstructed by the author, it offers a demographic analysis of League members and officers including an evaluation of the League's geographic distribution and the extent of women's participation in it." --Book Jacket.

Feminism and Motherhood in Western Europe, 1890–1970 A. Allen 2005-06-30 According to Allen, motherhood and citizenship are terms that are closely linked and have been redefined over the past century due to changes in women's

status, feminist movements, and political developments. Mother-child relationships were greatly affected by political decisions during the early 1900s, and the maternal role has been transformed over the years. To understand the dilemmas faced by women concerning motherhood and work, for example, Allen argues that the problem must be examined in terms of its demographic and political development through history. Allen highlights the feminist movements in Western Europe - primarily Britain, France, Germany and the Netherlands, and explores the implications of the maternal role for women's aspirations to the rights of citizenship. Among the topics Allen explores the history of the maternal role, psychoanalysis and theories on the mother-child relationship, changes in family law from 1890-1914, the economic status of mothers, and reproductive responsibility.

Beyond the Comparative John C. Weidman 2012-01-01 We are pleased to introduce this inaugural volume in the PSCIE Series—Beyond the Comparative: Advancing Theory and Its Application to Practice—which expands on the life work of University of Pittsburgh Professor Rolland G. Paulston (1929-2006). Recognized as a stalwart in the field of comparative and international education, Paulston's most widely recognized contribution is in social cartography. He demonstrated that mapping comparative, international, and development education (CIDE) is no easy task and, depending on the perspective of the mapper, there may be multiple cartographies to chart. The 35 contributors to this volume, representing a range of senior and junior scholars from various CIDE backgrounds and perspectives, celebrate the life and work of Paulston by addressing issues, perspectives and approaches related to charting the future course of the field. The volume reports on new research in several genres as well as conceptual analysis. As the title suggests, authors were encouraged to go "beyond" established canons of CIDE. The cover art, The CIDE Theoretical Compass, was conceptualized by the editors and depicts that theory selection and theory generation are an ongoing and important process in comparative, international, and development education (CIDE). The image was designed by artist Natalie Jacob, which positions the CIDE Theoretical Compass over Rolland G. Paulston's 1993 concentric circle map.

The Politics of Inclusion and Empowerment J. Andersen 2004-04-20 Globalization poses new challenges for the modern welfare state and democracies. One controversial issue is how struggles for economic equality are linked with struggles for recognition of difference according to gender, ethnicity and sexuality. The Politics of Inclusion and Empowerment examines the political and academic debates about the inclusion or exclusion of women and marginalized social groups from different policy contexts. The focus is on the different class and gender regimes influencing the interplay of political, civil and social citizenship at different levels of politics.

Gendered Voices H.B. Holmarsdottir 2013-02-11 Internationally, there is growing awareness that the target of Education for All by 2015 will not be met unless more strident efforts are made to improve access for marginalized, hard-to-reach

children (most often girls). For almost four decades gender equality in education has been one of the key global concerns and as a result various organizations at national and international levels along with governments have initiated programs focusing on achieving gender equality, women's empowerment and improving girls' access to education. By focusing on access alone (i.e. gender parity) we may not understand how education can be used to achieve empowerment and influence cultural practices that are gender insensitive. In this volume we attempt to call into question the content of gender equality as simple parity and in doing so we reflect upon the following questions: • Do the global (macro) discourses on gender equality in education lead to a focus on numbers only or to more profound sustainable changes at the national (meso) level and the school (micro) level? • To what extent have national policies been adjusted to reflect the global discourses on gender equality? • Are schools/classrooms (micro) expected to adjust to these global discourses and if so in what ways has this happened? • What are the challenges of providing access to good quality education for girls in both countries? • Is there a dichotomy between the schools/classrooms on the one hand and the community on the other in terms of gender equality/equity? • To what extent is gender equality/equity imposed upon schools and communities and does it take into account the cultural practices in traditional communities? Key words: Gender equality, education, Global vs. local concerns 3 selling points: • The volume highlights that although research has shown how global educational policies homogenize national educational policies and are therefore playing what can be termed a neo-colonial role in identifying pivotal themes and topics in education across the world such as gender equality, literacy and quality education in local contexts, they are often steeped in a Western logic which is not always culturally relevant or conducive. Making global recommendations for education across cultures and places is thus not always unproblematic. • The volume highlights that a push for girls' schooling must navigate wisely in sensitive terrain where complex contextual aspects must be understood and taken into account. Girls' attendance and retention in school are important first steps in the struggle for epistemic access, but must be followed by serious deliberations about what kind of school and what kind of knowledge in the schools is appropriate, and about equality and equity. • The volume attempts to understand how the global gender goals in education affect both local policies and local practice and in doing so it attempts to question the simple focus on access only.

Feminism and the Abyss of Freedom Linda M. G. Zerilli 2020-11-13 In contemporary feminist theory, the problem of feminine subjectivity persistently appears and reappears as the site that grounds all discussion of feminism. In *Feminism and the Abyss of Freedom*, Linda M. G. Zerilli argues that the persistence of this subject-centered frame severely limits feminists' capacity to think imaginatively about the central problem of feminist theory and practice: a politics concerned with freedom. Offering both a discussion of feminism in its postmodern context and a critique of contemporary theory,

Zerilli here challenges feminists to move away from a theory-based approach, which focuses on securing or contesting "women" as an analytic category of feminism, to one rooted in political action and judgment. She revisits the democratic problem of exclusion from participation in common affairs and elaborates a freedom-centered feminism as the political practice of beginning anew, world-building, and judging. In a series of case studies, Zerilli draws on the political thought of Hannah Arendt to articulate a nonsovereign conception of political freedom and to explore a variety of feminist understandings of freedom in the twentieth century, including ones proposed by Judith Butler, Monique Wittig, and the Milan Women's Bookstore Collective. In so doing, Zerilli hopes to retrieve what Arendt called feminism's lost treasure: the original and radical claim to political freedom.

Gender History in Practice Kathleen Canning 2006 The eight essays collected in this volume examine the practice of gender history and its impact on our understanding of European history. Each essay takes up a major methodological or theoretical issue in feminist history and illustrates the necessity of critiquing and redefining the concepts of body, citizenship, class, and experience through historical case studies. Kathleen Canning opens the book with a new overview of the state of the art in European gender history. She considers how gender history has revised the master narratives in some fields within modern European history (such as the French Revolution) but has had a lesser impact in others (Weimar and Nazi Germany). *Gender History in Practice* includes two essays now regarded as classics—"Feminist History after the 'Linguistic Turn'" and "The Body as Method"—as well as new chapters on experience, citizenship, and subjectivity. Other essays in the book draw on Canning's work at the intersection of labor history, the history of the welfare state, and the history of the body, showing how the gendered "social body" was shaped in Imperial Germany. The book concludes with a pair of essays on the concepts of class and citizenship in German history, offering critical perspectives on feminist understandings of citizenship. Featuring an extensive thematic bibliography of influential works in gender history and theory that will prove invaluable to students and scholars, *Gender History in Practice* offers new insights into the history of Germany and Central Europe as well as a timely assessment of gender history's accomplishments and challenges.

Engendering The Social Marshall, 2004-03-01 This edited volume focuses on the problematic engendering of classical and contemporary sociological theory, addressing questions such as: How were the foundations of sociological theory shaped by an implicit masculinity? Did classical sociology simply reflect or actively construct theories of sexual difference? How were alternative accounts of the social suppressed in sociology's founding moments? Feminist interventions in sociology are still seen as marginal to sociological theorizing. This collection challenges this truncated vision of sociological theory. In part one, contributors interrogate the classical canon, exposing the masculinist assumptions that

saturate the conceptual scaffolding of sociology. In part two, contributors consider the long-standing and problematic relationship between sociology and feminism, retrieving voices marginalized within or excluded from canonical constructions of sociological theory. In part three, contributors engage with key contemporary debates, explicitly engendering accounts of the social. *Engendering the Social* is unique in that it not only critically interrogates sociological theory from a feminist perspective, but also embarks on a politics of reconstruction, working creatively at the interface of feminist and sociological theory to induce a more adequate conceptualisation of the social. This is a key text for undergraduate and postgraduate students in sociology, social theory and feminist theory.

Gender, Law and Economic Well-Being in Europe from the Fifteenth to the Nineteenth Century Anna Bellavitis 2018-07-04

This book offers a comparative perspective on Northern and Southern European laws and customs concerning women's property and economic rights. By focusing on both Northern and Southern European societies, these studies analyse the consequences of different juridical frameworks and norms on the development of the economic roles of men and women. This volume is divided into three parts. The first, *Laws*, presents general outlines related to some European regions; the second, *Family strategies or marital economies?*, questions the potential conflict between the economic interests of the married couple and those of the lineage within the nobility; finally, the third part of the book, *Inside the urban economy*, focuses on economic and work activities of middle and lower classes in the urban environment. The assorted and rich panorama offered by the history of the legislation on women's economic rights shows that similarities and differences run through Europe in such a way that the North/South model looks very stereotyped. While this approach calls into question classical geographical and cultural maps and well-established chronologies, it encourages a reconsideration of European history according to a cross-boundaries perspective. By drawing on a wide range of social, economic and cultural European contexts, from the late medieval to early modern age to the nineteenth century, and including the middle and lower classes (especially artisans, merchants and traders) as well as the economic practices and norms of the upper middle class and aristocracy, this book will be of interest to economic and social historians, sociologists of health, gender and sexuality, and economists.

The Cambridge Companion to Liberalism Steven Wall 2015-02-19 The political philosophy of liberalism was first formulated during the Enlightenment in response to the growth of the modern nation-state and its authority and power over the individuals living within its boundaries. Liberalism is now the dominant ideology in the Western world, but it covers a broad swathe of different (and sometimes rival) ideas and traditions and its essential features can be hard to define. *The Cambridge Companion to Liberalism* offers a rich and accessible exploration of liberalism as a tradition of political thought. It includes chapters on the historical development of liberalism, its normative foundations, and its core

philosophical concepts, as well as a survey of liberal approaches and responses to a range of important topics including freedom, equality, toleration, religion, and nationalism. The volume will be valuable for students and scholars in political philosophy, political theory, and the history of political thought.

Women's Citizenship and Political Rights S. Hellsten 2005-11-29 Combining research, theory and practice, pan-European perspectives and the disciplines of human rights, sociology and politics, this book offers a rare insight into the multiplicity of issues surrounding women's equality, citizenship and political rights in transitional Europe and an expanding European Union. From policy-making to civil rights, domestic violence and education, experienced authors present innovative research, analysis and suggestions for the future of women as participants in an evolving Europe.

Nordic Equality at a Crossroads Eva-Maria Svensson 2019-06-04 Originally published in 2004. *Nordic Equality at a Crossroads* makes a major contribution to the debates on equality and difference in contemporary Europe. In this absorbing work, feminist legal scholars from four Nordic countries provide a critical account of the latest legal policies in these countries linked with gender (in)equality, such as public financing of children's home care, regulation of the labour market towards substantive equality, and the reforms concerning violence against women. These issues are matters of concern everywhere in Europe, and the solutions adopted in the Nordic countries will be of interest to all policy-makers. The increasing multiculturalism and the shift toward greater market orientation, however, have challenged the traditional Nordic equality policies. The authors argue that a structural and contextual analysis of inequality, also in the field of law, is necessary to encounter the challenge of pluralism.

Gender Politics in the Expanding European Union Silke Roth 2008-09-01 In May 2004, after bringing their legislation into accordance with EU regulations, ten more countries joined the European Union. The contributors to this volume assess the impact of this historical development on gender relations in the new and old EU member states. Instead of focusing on either western or eastern Europe, this book investigates the similarities and differences in diverse parts of Europe. Although initially limited, gender equality was part of the original framework of the European Union, an organization often more open than national governments to feminist demands, as this volume illustrates with case studies from eastern and western Europe. The enlargement process thus provides some important policy instruments for increasing equality between men and women.

Debating the Woman Question in the French Third Republic, 1870–1920 Karen Offen 2018-01-11 Karen Offen offers a magisterial reconstruction and analysis of the debates around relations between women and men, how they are constructed, and how they should be organized, that raged in France and its French-speaking neighbors from 1870 to 1920. The 'woman question' encompassed subjects from maternity and childbirth, and the upbringing and education of

girls to marriage practices and property law, the organization of households, the distribution of work inside and outside the household, intimate sexual relations, religious beliefs and moral concerns, government-sanctioned prostitution, economic and political citizenship, and the politics of population growth. The book shows how the expansion of economic opportunities for women and the drop in the birth rate further exacerbated the debates over their status, roles, and possibilities. With the onset of the First World War, these debates were temporarily placed on hold, but they would be revived by 1916 and gain momentum during France's post-war recovery.

Gender and International Relations Jill Steans 2006-08-18 The second edition of Jill Steans' successful and highly respected book offers a comprehensive overview of feminist scholarship and feminist contributions to international relations, and provides an in-depth discussion of how feminist IR has sought to re-think key concepts and central areas of concern in the field. Its ten chapters cover core topics, such as feminist theories; international relations theory; gender in the theory and practice of 'state-making'; feminist perspectives on war and peace; feminist approaches to security; the gender dimension of international political economy; gender and the politics of development; and women's human rights as both a 'universal project' and a political tool. The book also discusses some of the key debates and exchanges that have taken place between feminist IR scholars and those located both in the 'mainstream' of IR and the newly constructed 'middle ground' of IR. It concludes by exploring the affinities between feminist IR and other 'critical' theories of IR and identifies new research trajectories and potentially productive lines of future theoretical inquiry in the discipline. The book will be of particular interest to students and scholars of international relations. It will also be useful to the general reader interested in exploring the complexities of thinking about gender issues and feminism in a global context.

Debating Women's Equality Ute Gerhard 2001 Gerhard (sociology, Johann Wolfgang Goethe University, Germany) examines equality as a principle and practice of law in history, and legal theory from a feminist perspective. She reviews the history of the women's movement in the 19th and 20th centuries, with a focus on Germany, and examines three major legal issues: women's rights in the public sphere, women's legal capacities in private law, and women's human rights. This work was first published in German in 1990 (C.H. Beck'sche Verlagsbuchhandlung); this American edition, somewhat revised, was translated by Allison Brown and Belinder Cooper and includes a new foreword. c. Book News Inc.

Rocking The Ship Of State Adrienne Harris 2019-07-11 This book considers the experience of women as children and as mothers, and feminist critiques of gender as important sources of insight into the conduct, dynamics, and motivation of a feminist peace politics, examining the history, the scope, and the current condition of women's peace movements.

Theoretical Perspectives on Gender and Development Jane L Connelly 2000 *Theoretical Perspectives on Gender and Development* demystifies the theory of gender and development and shows how it plays an important role in everyday life.

It explores the evolution of gender and development theory, introduces competing theoretical frameworks, and examines new and emerging debates. The focus is on the implications of theory for policy and practice, and the need to theorize gender and development to create a more egalitarian society. This book is intended for classroom and workshop use in the fields of development studies, development theory, gender and development, and women's studies. Its clear and straightforward prose will be appreciated by undergraduate and seasoned professional, alike. Classroom exercises, study questions, activities, and case studies are included. It is designed for use in both formal and nonformal educational settings.

New Perspectives on European Women's Legal History Sara L. Kimble 2016-07-01 This book integrates women's history and legal studies within the broader context of modern European history in the late nineteenth and twentieth centuries. Sixteen contributions from fourteen countries explore the ways in which the law contributes to the social construction of gender. They analyze questions of family law and international law and highlight the politics of gender in the legal professions in a variety of historical, social and national settings, including Eastern, Southern, Western, Northern and Central Europe. Focusing on different legal cultures, they show us the similarities and differences in the ways the law has shaped the contours of women and men's lives in powerful ways. They also show how women have used legal knowledge to struggle for their equal rights on the national and transnational level. The chapters address the interconnectedness of the history of feminism, legislative reforms, and women's citizenship, and build a foundation for a comparative vision of women's legal history in modern Europe.

Feminist Trouble Éléonore Lépinard 2020 This is an open access title available under the terms of a CC BY NC ND 4.0 International license. It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations. In Feminist Trouble, Eléonore Lépinard draws on extended fieldwork with numerous women's organizations in France and Quebec. Giving voice to devout women and women of color, Lépinard dissects hierarchies of privilege in feminist politics, grappling with Islam and Islamic veiling debates to understand how these changes have transformed contemporary feminist movements, intersectional politics, and the feminist collective subject.

Queer Forms Ramzi Fawaz 2022-09-06 How do we represent the experience of being a gender and sexual outlaw? In Queer Forms, Ramzi Fawaz explores how the central values of 1970s movements for women's and gay liberation—including consciousness-raising, separatism, and coming out of the closet—were translated into a range of American popular culture forms. Throughout this period, feminist and gay activists fought social and political battles to expand, transform, or wholly explode definitions of so-called "normal" gender and sexuality. In doing so, they inspired artists, writers, and filmmakers to invent new ways of formally representing, or giving shape to, non-normative genders

and sexualities. This included placing women, queers, and gender outlaws of all stripes into exhilarating new environments—from the streets of an increasingly gay San Francisco to a post-apocalyptic commune, from an Upper East Side New York City apartment to an all-female version of Earth—and finding new ways to formally render queer genders and sexualities by articulating them to figures, outlines, or icons that could be imagined in the mind's eye and interpreted by diverse publics. Surprisingly, such creative attempts to represent queer gender and sexuality often appeared in a range of traditional, or seemingly generic, popular forms, including the sequential format of comic strip serials, the stock figures or character-types of science fiction genre, the narrative conventions of film melodrama, and the serialized rhythm of installment fiction. Through studies of queer and feminist film, literature, and visual culture including Mart Crowley's *The Boys in the Band* (1970), Armistead Maupin's *Tales of the City* (1976–1983), Lizzie Borden's *Born in Flames* (1983), and Tony Kushner's *Angels in America* (1989–1991), Fawaz shows how artists innovated in many popular mediums and genres to make the experience of gender and sexual non-conformity recognizable to mass audiences in the modern United States. Against the ideal of ceaseless gender and sexual fluidity and attachments to rigidly defined identities, *Queer Forms* argues for the value of shapeshifting as the imaginative transformation of genders and sexualities across time. By taking many shapes of gender and sexual divergence we can grant one another the opportunity to appear and be perceived as an evolving form, not only to claim our visibility, but to be better understood in all our dimensions.??

Handbook of Gender and Women's Studies Kathy Davis 2006-04-27 This breathtakingly broad, interdisciplinary reader demonstrates how widely feminist thinking has spread, how deeply it has shaken settled assumptions in the disciplines and how much new light it throws on contemporary controversies. - Myra Marx Ferree, University of Wisconsin-Madison "A timely intervention and highly engaged, thoughtful and scholarly analysis of the state of gender and women's studies in the West by three eminent feminist scholars... Highly cognisant of the central issues that have fractured, blocked and enhanced western feminism." - Bev Skeggs, Goldsmiths "The comprehensiveness and the interdisciplinary range of themes are impressive, and they make the Handbook into a wonderful tool for teachers and students of women's and gender studies." - Nina Lykke, Linköping University Gender and women's studies is one of the most challenging fields within the social sciences - the dynamics of gender relations and the social and cultural implications of gender constructions offer a lively forum of debate. The Handbook of Gender and Women's Studies presents a comprehensive and engaging review of the most recent developments within the field, including the study of masculinity, the feminist implications of postmodernism, the 'cultural turn' and globalization. The authors review current research and offer critical analyses of women's and gender studies in work, the welfare state, family, education, religion, violence and war and feminist global politics. Edited by three leading academics from Europe and the United States, and with 25 chapters

written by scholars based throughout the world, the Handbook situates the most important debates in the field within a uniquely international and interdisciplinary context. The Handbook is a useful introduction to gender theory and an exciting starting-point for fresh debates.

Thinking Differently ATHENA (Project) 2002-10 Présentation sous <http://www.zedbooks.co.uk/> : "This is the first book to ask whether there is a specifically European dimension to some of the major issues in Women's Studies. In doing so, it fills some of the gaps in our knowledge about women and enriches debates hitherto dominated by Anglo-American influences. Among the new areas of enquiry opened up are : Europe's experience of repeated warfare has impacted significantly on women. Hence contributions focus on women and militarism, and ethnic cleansing as an attack on the family. The abidingly problematic relationship between feminism and anti-semitism, and issues of migration and 'whiteness' in a context where racism reflects the colonial histories of particular European countries. The importance of passion, the emotions and psychoanalytical theory for the politics of certain European countries. The decline of the welfare state across Europe, the issue of the relationship between women's rights and human rights, and the rise of the phenomenon of the single woman. Reading feminism from a European perspective enables readers to reflect upon the ways changes in political, social and cultural positions and practices over the past century in Europe have impacted on feminist thinking and theorizing. The volume also raises important issues about the transfer of feminist concepts across cultures and languages. And to English-speaking audiences the volume will offer different viewpoints on some of the key debates.

French Feminisms Gill Allwood 2012-09-10 In this text, Gill Allwood explores theories of masculinity emerging from French feminist theories of gender and from French feminist practice concerning violence towards women, highlighting both the commonalities and the specificities of the French case. She discusses the particular concern of French theorists with seduction, their rejection of the term "gender" and the centrality of the difference debate.; In the first part of the book, Allwood separately examines feminist theories of gender and sexual difference and the problem of male violence. She goes on to consider the developments which are taking place on the borderline between the two, examining the way in which these developments have contributed to an understanding of masculinity. Readdressing problems and debates that will be familiar to English-speaking readers, the text exposes cultural differences and similarities in the ways in which these problems are approached and it provides a detailed account of the changes in both feminist action and theory in

France in recent years.; This analysis of feminism in France should be of interest to student and scholars in French studies, European studies, gender studies and cultural studies.

The Subject of Liberty Nancy J. Hirschmann 2009-01-10 This book reconsiders the dominant Western understandings of freedom through the lens of women's real-life experiences of domestic violence, welfare, and Islamic veiling. Nancy Hirschmann argues that the typical approach to freedom found in political philosophy severely reduces the concept's complexity, which is more fully revealed by taking such practical issues into account. Hirschmann begins by arguing that the dominant Western understanding of freedom does not provide a conceptual vocabulary for accurately characterizing women's experiences. Often, free choice is assumed when women are in fact coerced--as when a battered woman who stays with her abuser out of fear or economic necessity is said to make this choice because it must not be so bad--and coercion is assumed when free choices are made--such as when Westerners assume that all veiled women are oppressed, even though many Islamic women view veiling as an important symbol of cultural identity. Understanding the contexts in which choices arise and are made is central to understanding that freedom is socially constructed through systems of power such as patriarchy, capitalism, and race privilege. Social norms, practices, and language set the conditions within which choices are made, determine what options are available, and shape our individual subjectivity, desires, and self-understandings. Attending to the ways in which contexts construct us as "subjects" of liberty, Hirschmann argues, provides a firmer empirical and theoretical footing for understanding what freedom means and entails politically, intellectually, and socially.
