Active Technologies for Network and Service Management Rolf Stadler 2003-07-31 This volume of the Lecture Notes in Computer Science series contains all papers accepted for presentation at the 10th IFIP/IEEE International Workshop on Distributed Systems: Operations and Management (DSOM'99), which took place at the ETH Zürich in Switzerland and was hosted by the Computer Engineering and Networking Laboratory, TIK. DSOM'99 is the tenth workshop in a series of annual workshops, and Zürich is proud to host this 10th anniversary of the IEEE/IFIP workshop. DSOM'99 follows highly successful meetings, the most recent of which took place in Delaware, U.S.A. (DSOM'98), Sydney, Australia (DSOM'97), and L'Aquila, Italy (DSOM'96). DSOM workshops attempt to bring together researchers from the area of network and service management in both industry and academia to discuss recent advancements and to foster further growth in this field. In contrast to the larger management symposia IM (Integrated Network Management) and NOMS (Network Operations and Management S-

posium), DSOM workshops follow a single-track program, in order to stimulate interaction and active participation. The specific focus of DSOM'99 is "Active Technologies for Network and Service Management," reflecting the current developments in the field of active and programmable networks, and about half of the papers in this workshop fall within this category.

The Primary ICT & E-learning Co-ordinator's Manual James Wright 2007-05-23
[This book is] absolutely wonderful. It will be my new Bible... I have used it loads already in preparation for my ICT Mark assessment. Taking on the role of ICT co-ordinator can be quite a daunting task but this step by step guide, breaking things down into manageable chunks will be very supportive. I love the blogging idea - the comments made by the characters are very realistic. This is just what new co-ordinators need, I wish I'd had this when I took over co-ordination of ICT! -

Christine Beedham, Primary ICT adviser, Warrington Every primary school has the daunting task of embedding ICT and e-learning into their curriculum. This practical manual is the first part of a two volume set that together makes up a detailed two year training programme for primary ICT and e-learning co-ordinators. The books combine key strategies and information with a weblog discussion from a group of 'virtual' co-ordinators who share their problems, fears and successes over the two-year programme, based on the author's wide experience of working with new

co-ordinators and experienced staff on training programmes and in general support. Book 1 is designed specifically for co-ordinators new to the role who need starting points and broad support. It presents a structured training programme split over three terms, guiding co-ordinators through the key stages of developing and implementing ICT policy and practice, including:

- o auditing existing school systems
- o reviewing and revising the school policy for ICT
- o reviewing the ways in which ICT is used as a teaching and learning tool across the curriculum
- o examining methods for the management of technical support services
- o establishing a clear overview of standards in ICT, including a review of assessment procedures, moderating work, monitoring teaching and learning and creating E Portfolios.

The books have a companion website, which will offer downloadable versions of the photocopiable sheets from the book, as well as links to other sources of help and advice.

Windows XP Home Edition David Pogue 2004 Explains how to get accustomed to the new operating system and master its features, covering topics such as using menus and control panels, networking multiple PCs, and finding lost files.

Tele-AAC Nerissa Hall 2019-06-28 Tele-AAC: Augmentative and Alternative Communication Through Telepractice is the first comprehensive resource guide to Tele-AAC. Tele-AAC is the use of telepractice specifically for providing services to individuals using augmentative and alternative communication (AAC). This text establishes Tele-AAC as a new service delivery model and promotes safe, efficacious, evidence-based, and ethical telepractice for individuals who need AAC systems. The goal is to provide readers with fundamental information about policy and service delivery of AAC services via telepractice to enable clinical practice. The text details the specific technical components unique to Tele-AAC service delivery, and how the technology, personnel, and service delivery practices may vary across settings and populations. It offers didactic and case-based content for speech-language pathologists across all levels, from introductory to advanced. Chapters are included that clarify and define the term Tele-AAC, highlight the procedures used while providing assessment and intervention via Tele-AAC, identify ethical and cultural considerations while providing Tele-AAC, and demonstrate its application in a variety of settings. The content has been enriched by the input and knowledge offered by leaders from both telepractice and AAC disciplines, and offers readers the right combination of foundational information

and principles to help form a base of understanding for practitioners engaging in Tele-AAC. The field of Tele-AAC is evolving and will transform as the technology changes and advances. This text provides a threshold of understanding from which the field and practitioners can grow.

Electronic service delivery in the driver, vehicle and operator agencies in Great Britain Great Britain: National Audit Office 2008-01-16 The Driver and Vehicle Licensing Agency, the Driving Standards Agency and the Vehicle and Operator Services Agency provide services for 42 million drivers, the keepers of 36 million vehicles, 100,000 commercial vehicle operators and 19,000 authorised MoT businesses in Great Britain. The services include issuing driving licences and vehicle registration documents and conducting driving and Heavy Goods Vehicle and Public Service Vehicle roadworthiness tests. The Driver and Vehicle Licensing Agency is also responsible for collecting Vehicle Excise Duty, which raised £5 billion in 2006-07, working with a range of stakeholders, such as the police, to enforce collection of this Duty. The Agencies handled some 124 million customer transactions in 2006-07 for the range of services which could be made available electronically. This report examines six of the 15 services available electronically,

in which the Agencies have invested at least £60 million to improve access and service delivery. The services accounted for 12.6 million electronic transactions in 2006-07: applications for provisional driving licence; booking of driving tests (both practical and theory); taking driving theory tests; upgrading from a provisional to full driving licence; buying car tax or making a Statutory Off-Road Notification; and changing commercial vehicle operators' records. The Agencies' investment of some £60 million in new technology to improve access and delivery of five of these services, and their further investment in the services for booking and taking the driving theory test, have made the services easier and quicker for customers to access and less burdensome to use. After taking account of the development cost, the services should also lead to savings of at least £33 million but to achieve these take-up must increase and some aspects of the services must improve.

Switching to the Mac: The Missing Manual, Snow Leopard Edition David Pogue
2009-12-09 Is Windows giving you pause? Ready to make the leap to the Mac instead? There has never been a better time to switch from Windows to Mac, and this incomparable guide will help you make a smooth transition. New York Times columnist and Missing Manuals creator David Pogue gets you past three challenges: transferring your stuff, assembling Mac programs so you can do what you did with Windows, and learning your way around Mac OS X. Learning to use a

Mac is not a piece of cake, but once you do, the rewards are oh-so-much better. No viruses, worms, or spyware. No questionable firewalls, inefficient permissions, or other strange features. Just a beautiful machine with a thoroughly reliable system. Whether you're using Windows XP or Vista, we've got you covered. If you're ready to take on Mac OS X Snow Leopard, the latest edition of this bestselling guide tells you everything you need to know: Transferring your stuff -- Moving photos, MP3s, and Microsoft Office documents is the easy part. This book gets you through the tricky things: extracting your email, address book, calendar, Web bookmarks, buddy list, desktop pictures, and MP3 files. Re-creating your software suite -- Big-name programs (Word, Photoshop, Firefox, Dreamweaver, and so on) are available in both Mac and Windows versions, but hundreds of other programs are available only for Windows. This guide identifies the Mac equivalents and explains how to move your data to them. Learning Snow Leopard -- Once you've moved into the Mac, a final task awaits: Learning your way around. Fortunately, you're in good hands with the author of Mac OS X: The Missing Manual, the #1 bestselling guide to the Macintosh. Moving from Windows to a Mac successfully and painlessly is the one thing Apple does not deliver. Switching to the Mac: The Missing Manual, Snow Leopard Edition is your ticket to a new

computing experience.

Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions” (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear

children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

The Limitless City Oliver Gillham 2002-03 One of the great debates of our time

concerns the predominant form of land use in America today -- the all too familiar pattern of commercial and residential development known as sprawl. But what do we really know about sprawl? Do we know what it is? Where did it come from? Is it really so bad? If so, what are the alternatives? Can anything be done to make it better? The Limitless City offers an accessible examination of those and related questions. Oliver Gillham, an architect and planner with more than twenty-five years of experience in the field, considers the history and development of sprawl and examines current debates about the issue. The book: offers a comprehensive definition of sprawl in America traces the roots of sprawl and considers the factors that led to its preeminence as an urban and suburban form reviews both its negative impacts (loss of open space, increased pollution, gridlock) as well as its positive aspects (economic development, personal freedom, privacy) considers responses to sprawl including "smart growth," urban growth boundaries, regional planning, and the New Urbanism looks at what can be done to improve and counterbalance sprawl The author argues that whether we like it or not, sprawl is here to stay, and only by understanding where it came from and why it developed will we be able to successfully address the problems it has created and is likely to create in the future. The Limitless City is the first book to provide a realistic look at sprawl, with a frank recognition of its status as the predominant urban form in

America, now and into the near future. Rather than railing against it, Gillham charts its probable future course while describing critical efforts that can be undertaken to improve the future of sprawl and our existing urban core areas.

The Philosopher's Stone for Sustainability Yoshiki Shimomura 2012-09-19

Industrial Product-Service Systems (IPS2), which is defined as “an integrated industrial product and service offering that delivers value in use,” has expanded rapidly over the last decade. IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services. We are now struggling with many awkward issues related to sustainability, but IPS2 is expected to be the “philosopher’s

stone” for solving these issues. Following the pattern of conferences held in Cranfield in 2009, Linköping in 2010, and Braunschweig in 2011, the fourth International CIRP Conference on Industrial Product-Service Systems, held on November 8-9, 2012, in Tokyo, will cover various aspects of IPS2. Topics planned for this year’s conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries. IPS2 is still a relatively new field, so it is important to keep track of the entire context in order to promote more cross-sectional cooperation between multimodal fields and disciplines. The fourth International CIRP Conference on Industrial Product-Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas.
