Ducati Desmoquattro Superbikes Ian Falloon 2002-06 Ducati stunned the world in 1988 when the struggling, small Italian firm unleashed its Desmoquattro -- 8-valve, desmodromic -- Superbike. The bike found success on the world's racetracks right from the start. Road-going versions soon carried that success to the general public, proving this design wasn't just another noisy prototype. The Superbikes -- 748, 851, 888, 916, and 996 -- are now Ducati's best-selling machines in the United States; and the Desmoquattro engine found its way into the company's more pedestrian series such as the Monster roadster and ST4 sport-tour. This is the comprehensive volume on Ducati's ultimate performance motorcycles and replaces the out-of-print Ducati Super Bikes: 851, 888, 916.

A-Z of Italian Motorcycle Manufacturers Greg Pullen 2018-10-23 Italian motorcycles have a place in history – and many enthusiasts’ hearts – out of all proportion to the numbers that have been built. From Moto Guzzi becoming the first non-British marque to win a TT through to Ducati’s achievements in MotoGP, they have also been at the forefront of motorsport despite being far smaller than, at first, the British and later the Japanese manufacturers. If the number of motorcycles built by Italian manufacturers is small, the sheer number of Italian motorcycle factories will surprise readers. Almost 600 marques were identified in researching this book, and there may have been thousands. This is partly because there were so many engines available off the shelf – many of them English – as well as a thriving accessory and component industry. A–Z of Italian Motorcycle Manufacturers only deals briefly with the grand marques Ducati and Moto Guzzi because there have been many dedicated books about them. Instead this is a definitive guide to the factories that have been less widely covered or, in most cases, never before in the English language. Some, such as Bianchi and Garelli, might be familiar: others, remembered for their racing achievements or uniqueness, such as Morbidelli, and many you may have never heard of. But if it was possible to establish when and where the factories were active, and at least a little about the motorcycles they built, then there is an entry for them. An appendix lists the other manufacturers that are lesser known, making this the most complete reference book of Italian motorcycles available today. This book is a complete guide to Italian motorcycle manufacturers, and an essential reference for anyone with an interest in these fascinating vehicles. The Complete Book of Ducati Motorcycles Ian Falloon 2016-07 From the single-cylinder bikes of the 1950s to the high-performance sportbikes of today, The Complete Book of Ducati Motorcycles showcases the entire spectrum of Ducati. Legendary Ducati motorcycles have something of a rags-to-riches story. This Italian motorcycle manufacturer began by selling motorized bicycles to impoverished residents of post-World War II Italy. Today, Ducati is the world's premier manufacturer of street motorcycles whose sales continue to rise year after year. Its svelte, hyper-accelerating motorcycles are two-wheeled wonders that are fluent in the language of speed. The Complete Book of Ducati Motorcycles traces the stunning chronology of the motorcycles dreamed up by Ducati, from the 1950s to present day. Laid out for the first time in encyclopedia form with gorgeous photography and insights from Ducati expert Ian Falloon, this book offers motorcycle enthusiasts a closer look at the craftsmanship, power, and beauty of these extraordinary motorcycles. The book features all of the motorcycles from Ducati's storied history, including the groundbreaking Desmodromic 750 Super Sport, the Mike Hailwood Replica, the superbike-dominating 916, and the epic Panigale. From the street bikes that gave birth to the very notion of the modern superbike to the racing motorcycles that dominated tracks in Great Britain, Europe, and North America since the latter part of the twentieth century, The Complete Book of Ducati Motorcycles runs the full gamut of sportbikes. It's a collection that demands shelf space in the library of any true motorcycle collector or fan.

Building a Special with Ant Anstead Master Mechanic Ant Anstead 2021-07-20 Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.

The Ducati Story - 6th Edition Ian Falloon 2018-06-19 The Ducati Story is brought right up to date in this new edition of Ian Falloon's authoritative book, covering the complete history of the marque. Initially under government control, Ducati went through several decades of ups and downs, characterized by dubious managerial decisions. Held together by the great engineer Fabio Taglioni, the father of desmodromic valve gear, Ducati produced some of the finest motorcycles of the 1950s, 1960s and 1970s: the Marianna, desmo 125 single, Mach 1, 750 and Pantah. Taglioni also instigated Ducati's return to racing, and victory in the 1972 Imola 200 was the turning point. Mike Hailwood rode the 900 Ducati to victory in the 1978 Isle of Man Formula One race and Tony Rutter took four World TT2 Championships. Cagiva purchased Ducati in 1985, bringing a new engineer, Massimo Bordi, and new designs - most famously the Desmoquattro. In various guises, this model dominated the World Superbike Championship during the 1990s, particularly in the hands of Carl Fogarty. Landmark models included the 916 and Monster, and, with the sale of Ducati to the Texas Pacific Group in 1996, the company continued to grow. The racing program expanded to MotoGP and new model families were introduced. With control taken by the Italian company InvestIndustrial in 2006, Ducati embarked on the next era of development: Casey Stoner winning the MotoGP World Championship in 2007. Now under the Audi umbrella Ducati continues to thrive. This new edition includes a brand new chapter featuring all the models from 2012 up to 2018.
