Crocheting is a common practice in the current world. It is a process by which a person creates fabrics through interconnecting loops of strands, threads or yarns of different materials. The complex process is made easier by the use of a crochet hook. The name crochet hook has been derived from term crochet in the French language. This term is used to refer to a small hook in the French language. The term is also related to a German crock which means a hook. The crochet hook is made of different types of materials. These materials include plastics, woods, or metal which are commercially manufactured and products made in workshops of artisans. Several people are confused when it comes to differentiating crocheting and knitting. However, there is a significant difference between the two processes. The difference is firstly noted with the instruments used in the processes. The second difference is noted in the process. While crocheting, an individual is supposed to complete each stitch then carry on to the next stitch. However, several stitches are left uncompleted at a similar time while an individual is knitting. Various systems that prefer this kind of system include the broomstick lace and Tunisian crotchet. It is because they keep several crotchet stitches being open at a similar time. This book is designed for complete beginners and I will be starting right from the very beginning - the materials and instruments that you need, the different stitches, and how to start and finish a piece of crochet.
