British Leyland - From Triumph to Tragedy Lance Cole 2021-01-18 What really happened at British Leyland (BL)? Was it 'just' the cars, or were other factors vital to the story? Who really was to blame for BL and MG Rover's death? The 'truth' about BL is deeper than its cars – were ultra- Left-wing plots to topple BL and British society real? Did secret deals and political intrigue really exist? Was it Labour or Conservative powers who 'killed' BL, or was it BL itself? How was it that BL's design genius was hobbled? Author Lance Cole lifts the bonnet on BL and presents a forensic yet easy to read new analysis in a story of BL, its cars, and the era of their motoring as powers on the political Left and Right waged war, sometimes even with themselves. Here is a book about cars and more, a conversation on all things BL: this is a new account of a classic British story told across a trail of evidence in a British industrial and political drama. Many mistakes made BL, but some of the cars were superb, the designs of genius, the

engineering excellent; it is just that we have either forgotten, or been brainwashed into believing the worst. In a BL book like no other, written by a classic car fanatic with a background in industrial design, automotive, and wider journalism, this story lifts the lid on BL's cars and more. The author also adds inside knowledge from time working in the motor industry. Lance Cole tells the deeper BL story across the era of its greatest successes and its biggest failures.

The Entangling Net Leslie Leyland Fields 1997 "Truly remarkable portraits of courage." -- John van Amerongen, editor, Alaska Fisherman's Journal "These little-known tales of women working in Alaska's commercial fishing industry make for great reading. . . . Readers will be amazed by their stories." -- Laine Welch, Alaska Fish Radio "A richly textured story, a multi-genre text that invites readers to witness women's conversation with America's last frontier, Alaska." -- Patricia Foster, University of Iowa Why do women choose an occupation that has been ranked the most dangerous in the nation? What do women give up--and get in return--when they take on the tasks of fishermen? The Entangling Net explores these issues through the stories of twenty women who have chosen to work in this extremely risky, male-dominated profession. Leslie Leyland Fields lyrically weaves their stories with her own experiences as a fishing woman. She tells of long, exhausting days in skiffs, catching fish in brutally cold weather on waters that are often violent. Her words and those of the women she interviews convey the paradoxical relationship the women have with commercial fishing: they face extraordinarily difficult working conditions made more difficult and dangerous by male crews and skippers who don't welcome women, yet they feel impelled by the challenge of the work to return to their jobs season after season.

A Designer's Research Manual Jennifer Visocky O'Grady 2009-02-01 Doing research can make all the difference between a great design and a good design. By engaging in competitive intelligence, customer profiling, color and trend forecasting, etc., designers are able to bring something to the table that reflects a commercial value for the client beyond a well-crafted logo or brochure. Although scientific and analytical in nature, research is the basis of all good design work. This book provides a comprehensive manual for designers on what design research is, why it is necessary, how to do research, and how to apply it to design work.
