Flight of Passage Rinker Buck 2013-03-05 Writer Rinker Buck looks back more than 30 years to a summer when he and his brother, at ages 15 and 17 respectively, became the youngest duo to fly across America, from New Jersey to California. Having grown up in an aviation family, the two boys bought an old Piper Cub, restored it themselves, and set out on the grand journey. Buck is a great storyteller, and once you get airborne with the boys you find yourself absorbed in a story of adventure and family drama. And Flight of Passage is also an affecting look back to the summer of 1966, when the times seemed much less cynical and adventures much more enjoyable.

Manifesto Mike Busch 2014-07-07 "There's a dirty little secret about aviation maintenance: it often breaks aircraft instead of fixing them." "Manifesto" is the much-anticipated first book from renowned aviation columnist and speaker Mike Busch. Written in typical no-nonsense style, it lays out the basis of Mike's "minimalist" maintenance philosophy for owner-flown general aviation aircraft. An owner who follows the book's guidance can save a small fortune on maintenance costs and end up with a safer, more reliable aircraft. Owners are advised to perform the absolute least amount of maintenance required to make their aircraft safe, reliable and legal... and nothing more. The book explains in detail why engine and propeller TBOs and most other manufacturer-prescribed maintenance intervals should be disregarded. And "Manifesto" explains exactly how to do it. About the Author: Mike Busch is arguably the best-known A&P/IA in general aviation. In 2008, he was honored by the FAA as "National Aviation Maintenance Technician of the Year." Mike has been a prolific aviation writer for more than four decades. His "Savvy Aviator" columns have appeared in numerous publications including EAA Sport Aviation, AOPA's Opinion Leader's Blog, AVweb, and magazines for the three largest GA type clubs (ABS, CPA, and COPA). He is renowned for his free monthly maintenance webinars and his standing-room-only forums at EAA AirVenture Oshkosh. Mike has been a pilot and aircraft owner for 45 years with 7,500+ hours logged, and he is a CFII/ME. He's founder and CEO of Savvy Aircraft Maintenance Management, Inc., the world's largest firm providing maintenance-management services for owner-flown aircraft.

Aviation Safety in Alaska DIANE Publishing Company 1998 Examines Alaska's current aviation environment and air transportation activities. Identifies the associated risk factors and safety deficiencies. Recommends practical measures for managing the risks to safe flight operations given the reality of Alaska's aviation environment and the potential of new technologies. Contents: Alaska's aviation operations and accidents; factors affecting the safety of takeoffs and landings in Alaska; factors affecting the safety of VFR operations in Alaska; enhancing the low altitude IFR system to fulfill Alaska's air transport requirements; and special aviation operations in Alaska.
