Enhancing Humanity N. Aloni 2007-10-01 In Jean PaulSartre's Nausea, Roquentin feels bound to listen to the sentimental ramblings about humanism and humanity by the Self Taught Man. "Is it my fault," muses Roquentin, "in all he tells me, I recognize the lack of the genuine article? Is it my fault if, as he speaks, I see all the humanists I have known rise up? I have known so many ofthem!" And then he lists the radical humanist, the so called"left" humanist, and Communist Humanist, the Catholic humanist, all claiming a passion for their fellow men. "But there are others, a swarm of others: the humanist philosopher who bends over his brothers like a wise older brother with a sense of his responsibility; the humanist who loves men as they are, the humanist who loves men as they ought to be, the one who wants to save them with their consent, and the one who will save them in spite of themselves. . . ." Quite naturally, the skeptical Roquentin ends by saying how "they all hate each other: as individuals, not as men. " Fully aware of the misuse and false comfort in the use of the term, Professor Aloni proceeds to restore meaning to the word as well as appropriate its educational significance. There is a freshness in this book, a restoration of a lost clarity, a regaining of authentic commitment.

Learner-Centered Teaching Maryellen Weimer 2008-05-02 In this much needed resource, Maryellen Weimer-one of the nation's most highly regarded authorities on effective college teaching-offers a comprehensive work on the topic of learner-centered teaching in the college and university classroom. As the author explains, learner-centered teaching focuses attention on what the student is learning, how the student is learning, the conditions under which the student is learning, whether the student is retaining and applying the learning, and how current learning positions the student for future learning. To help educators accomplish the goals of learner-centered teaching, this important book presents the meaning, practice, and ramifications of the learner-centered approach, and how this approach transforms the college classroom environment. Learner-Centered Teaching shows how to tie teaching and curriculum to the process and objectives of learning rather than to the content delivery alone.

Ethics Jacques P. Thiroux 2009 With a clear presentation, Ethics: Theory and Practice educates readers about ethical theory and has them apply what they learn to specific classic and contemporary moral problems (lying, cheating, establishing ethical business practices, honoring ethical obligations in medicine, etc.). Jacques P. Thiroux first wrote this text 1977 in order to educate readers about ethical theory and its applications in a way that beginning students could understand. The result was an accessible text that isn't too technical and doesn't plunge into complex readings without sufficient background. The text is fully updated with global issues and non-Western ethical views. Keith W. Krasemann now continues Thiroux's efforts of making Ethical Ideas accesible to students. Besides updating the foundations of the text, Krasemann incorporates new and relevant material, most of which is often unique only to this text.

Philosophy 101 by Socrates Peter Kreeft 2002 The popular author and Boston College philosophy professor, Kreeft, presents this introduction to philosophy to help beginners not only to understand philosophy but to fall in love with it. In his forty years of teaching philosophy, Kreeft says the

most effective way to accomplish this purpose is to read Socrates. Philosophy means "the love of wisdom." Kreeft uses the dialogues of Socrates in this book to help the reader grow in that love of wisdom. He says that no master of the art of philosophizing has ever been more simple, clear, and accessible to beginners as Socrates. He focuses on Plato's dialogues, the Apology of Socrates, as a model partner for the reader to dialogue with. Kreeft calls it "the Magna Carta of philosophy," a timeless classic that is "a portable classroom."
