Food for Thought Simona Stano 2021-10-20 This volume offers new insights into food and culture. Food habits, preferences, and taboos are partially regulated by ecological and material factors - in other words, all food systems are structured and given particular functioning mechanisms by specific societies and cultures, either according to totemic, sacrificial, hygienic-rationalist, aesthetic, or other symbolic logics. This provides much "food for thought". The famous expression has never been so appropriate: not only do cultures develop unique practices for the production, treatment and consumption of food, but such practices inevitably end up affecting food-related aspects and spheres that are generally perceived as objectively and materially defined. This book explores such dynamics drawing on various theoretical approaches and analytical methodologies, thus enhancing the cultural reflection on food and, at the same time, helping us see how the study of food itself can help us understand better what we call "culture". It will be of interest to anthropologists, philosophers, semioticians and historians of food.

Blood-Kissed Sky J. A. London 2012-12-26 The second book in a romantic and drama-packed trilogy perfect for fans of Rachel Vincent, Julie Kagawa, and Alyson Noel. Lusciously romantic and full of action-packed drama, readers will be swept away by this thrilling novel. Dawn Montgomery knows that monsters really do come out at night—after all, they are her job. It's just after the thirty-year war between vampires and humans, and as an ambassador between the two sides (a role she inherited when her parents were killed), Dawn quickly learns that balancing schoolwork, teen life, and the requests of Lord Valentine, the most frightening vampire in the region, isn't easy. There's nowhere left to hide. I thought vampires were our enemies—they controlled our lives,

isolated our cities, and demanded our blood—until I met Victor. With Victor taking over as the new Lord Valentine, things were supposed to get better. Instead, they're worse than ever. Day Walkers, a new breed of vampires who can walk in the sun, are terrorizing the city. Blood supplies are low, and if Victor's vampires don't get enough, they will become infected with the Thirst—a disease that will turn them into mindless killers. To stop it, I must journey across the desolate wasteland to the very place where the sickness began. I can only hope that the answers that await me are enough to save us all...before it's too late.

Read My Lips Debby Herbenick 2011-11-16 Many, if not most, people remain in the dark about the actual workings of the vagina and vulva. The primary purpose of Read My Lips is to educate women and men about the vulva and vagina in a manner that is smart, informative, and entertaining. Readers, both women and men alike, will come to think differently about women's genitals and become a little more curious and a lot more comfortable with them. They will learn more about the female body in terms of health, sex, pleasure, culture, and art. Though based on sound scientific and medical research, Read My Lips is accessible to the masses, so women and men who are curious about the clitoris, Brazilian waxing, labiaplasty, or whether the G-spot really exists, will find something of interest in these pages. Chapters focus on sex and the vulva/vagina which, in spite of the many interesting cultural and historical aspects of vulva and vagina lore, remains of central interest to many people - as it should, given that women's genitals, and how they work, especially in regard to sex, remain a mystery to so many well-intentioned lovers. In keeping with the overall theme of celebration and education, the authors take a sex-positive, pleasure-focused perspective on women's genitals, pointing out the parts that can help women to enjoy sex and feel more comfortable in their own bodies. Tips on technique will also be shared alongside information on vaginal health.

Protest, Popular Culture and Tradition in Modern and Contemporary Western Europe Ilaria Favretto 2017-04-10 Mock funerals, effigy parading, smearing with eggs and tomatoes, pot-banging and Carnival street theatre, arson and ransacking: all these seemingly archaic forms of action have been regular features of modern European protest, from the 19th to the 21st century. In a wide chronological and geographical framework, this book analyses the uses, meanings, functions and reactivations of folk imagery, behaviour and language in modern collective action. The authors examine the role of protest actors as diverse as peasants, liberal movements, nationalist and separatist parties, anarchists, workers, students, right-wing activists and the global justice movement. So-called traditional repertoires have long been described as residual and obsolete. This book challenges the conventional distinction between pre-industrial and post-1789 forms of collective action, which continues to operate as a powerful dichotomy in the understanding of protest, and casts new light on rituals and symbolic performances that, albeit poorly understood and deciphered, are integral to our protest repertoire.

Marginalised Communities in Higher Education Neil Harrison 2021 "Drawing on examples from nine countries across five continents, this book offers anyone interested in the future of higher education the opportunity to understand how communities become marginalised and how this impacts on their access to learning and their ability to thrive as students. Focusing on groups that suffer directly through discriminatory practices or indirectly through distinct forms of sociocultural disadvantage, this book brings to light communities about which little has been written and where research efforts are in their relative infancy. Each chapter documents the experiences of a group and provides insights that have a wider reach and gives voice to those that are often unheard. The book concludes with a new conceptualisation of the social forces that lead to marginalisation in higher education. This cutting-edge book is a must read for higher education researchers, policy makers, and students interested in access to education, sociology of education, development studies, and cultural studies"--
