An Angler's Reminiscences Charles Hallock 2015-06-13 Excerpt from An Angler's Reminiscences: A Record of Sport, Travel, and Adventure Charles Hallock's literary career, covering a period of sixty years - beginning with the editorship of a college paper, "The Scorpion," at

Amherst, in 1852 - has been remarkable for wide range, and thorough mastery of each subject. Although angling has always been his favorite recreation his active participation in other manly outdoor sports is indicated by the title, "Dean of American Sportsmen," conferred by prominent brothers of the guild in recognition of his ability as a practical exponent of healthful pastimes, and as an author - an acknowledged authority - in this branch of literature. Turning to the brief autobiography in this volume - a classic in its special line - the reader will find some of the salient features of a life work great in achievement, varied in scope - from scientific research to current comment on the topics of the day; from sojourning in the Sunny South to pioneer jaunts in the wild West and to far-off Alaska - yet interspersed always with pursuit of the pastimes he loved, with rod and gun. His recreations - like those of "Christopher North" - furnished material for delightful sketches, standard works, scientific essays. His companions were men of action - the hardy voyageurs, at home in primitive craft on wild waters, or on foot along wild trails; ardent anglers seeking adventurous sport on salmon rivers and trout streams far from routes of ordinary tourists; scholars and scientists delving deep in the study of animated nature. That Charles Hallock is and has long been a recognized force, an accepted authority in matters pertaining to fish and fishing, science and travel, is evidenced by the fact that he is an active or honorary member of no less than fifty-seven clubs and associations, many of these being organizations of national and some of international scope. His copyrighted books are seventeen in number, and his various articles in the magazines, sportsmen's journals and daily press would, if collected in library form, fill fifty volumes of absorbing interest. The condensed summary, given elsewhere in this work, records the remarkable fact that outside of newspaper work his occupations and important experiments reached a total of sixty-seven, while his hairbreadth escapes numbered twenty-eight. As an editor, particularly in his favorite field, he possessed the qualifications to acquire the full measure of success. His literary style was here shown in its versatile character, its vigor, and perfect command of the English language. A valuable adjunct was his world-wide acquaintance with men of mark in sportsmanship and the world of letters. 98. 6 Degrees Cody Lundin 2011-05-16 If you breathe and have a pulse, you NEED this book. -Cody Lundin Cody Lundin, director of the Aboriginal Living Skills School in Prescott, Arizona, shares his own brand of wilderness wisdom in this highly anticipated new book on commonsense, modern survival skills for the backcountry, the backyard, or the highway. It is the ultimate book on how to stay alive-based on the principal of keeping the body's core temperature at a lively 98.6 degrees. In his entertaining and informative style, Cody stresses that a human can live without food for weeks, and without water for about three days or so. But if the body's core temperature dips much below or above the 98.6 degree mark, a person can literally die within hours. It is a concept that many don't take seriously or even consider, but knowing what to do to maintain a safe core temperature when lost in a blizzard or in the desert could save your life. Lundin delivers the message with wit, rebellious humor, and plenty of backcountry expertise. Cody Lundin and his Aboriginal Living Skills School have been featured in dozens of national and international media sources, including Dateline NBC, CBS News, USA Today, The Donny and Marie Show, and CBC Radio One in Canada, as well as on the cover of Backpacker magazine. When not teaching for his own school, he is an adjunct faculty member at Yavapai College and a faculty member at the Ecosa Institute. Cody is the only person in Arizona licensed to catch fish with his hands, and lives in a passive solar earth home sixty miles from Prescott, Arizona.

Now, for the first time, the people behind the show's seminal

moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

An Angler's Reminiscences Charles Hallock 2017-09-15 Excerpt from An Angler's Reminiscences: A Record of Sport, Travel, and Adventure Young, of Hingham, Norfolk County, England, who landed in New Haven, Conn., October 21, 1640. He subsequently received from Governor Dougan, under James II., a grant of acres of land lying between Southampton and Montauk Point. The obituary notice of William, son of Peter, the founder of the Southold Colony, who died September 30, 1684, and is so recorded, is spelled Holyoake. Through his mother he is descended from Rev. Thomas Mayhew, Governor of Nantucket and Martha's Vineyard, under a grant from Lord Sterling in 1614. Of their descendants, one branch became Quakers, and to this Fitz Greene Halleck, the poet belonged; others comprised among their numbers eminent fighting men, distinguished in the American revolution and since, both on land and sea. During the revolution Joseph Hallock fell as commander of a privateer; William Halleck commanded packet boats on Long Island Sound; another William Hallock owned and commanded a vessel sunk by the English ship Snow, and had two sons, Jeremiah and Moses, who were also soldiers of the revolution. During the Civil War many members of the family fought in support of the Union, notably Major General Henry W. Halleck. A portion of Charles Hallock's life was passed on his uncle's farm, at Plain held, in a wilderness section of the Green Mountains in Massachusetts, where he imbibed those tastes for. Outdoor sports and adventure which so largely shaped his course through life. In those youthful days he occupied a secluded shooting box on the estate in preference to the farm house, except in coldest winter weather. Having fitted for college at Hopkins Grammar School, in New Haven, Conn., he entered Yale in 1850, but subsequently went to Amherst, where, in 1862, during his sophomore year, he printed a college paper named the Scorpion. This seems to have been his first journalistic venture, and the taste for newspaper work then imbibed, or more probably inherited from his father, who was at that time the active head of the New York Journal of Commerce, induced him to discontinue his collegiate course of study early in the junior year and enter the printing office of his father. There he mastered the rudiments of a journalistic education. Although not a college graduate, the faculty of Amherst subsequently conferred upon him, in 1871, the degree of A. B. Extraordinary, the first honor of the kind which it had conferred. In the spring of 1855 he attached himself to the New Haven Register, and conducted that paper for a year and a half for its proprietor, M. A. Osborn, Esq., then collector of the port. In August, 1856, he accepted a salary and one sixteenth proprietary interest in the Journal of Commerce, and remained until September, 1861, when the political troubles threw him out of his chair, but not of his ownership in the paper, which at that time had increased to about one-tenth. Effective Leadership in Adventure Programming Simon Priest 2018-10-30 Some books address outdoor leadership; others focus on adventure programming. None delve into the specifics of both topics like Effective Leadership in Adventure Programming, Third Edition, does. The first edition of this book helped define the body of knowledge for an emerging profession. Two editions later, this groundbreaking text—now in full color—provides adventure leaders with the tools and evidence they need to show that their outdoor programs are effective and have a lasting impact on their participants. Internationally renowned authors Simon Priest and Michael Gass have significantly updated the content, based on the latest research, issues, and trends in the field of adventure education and leadership. They have reorganized chapters to conform to their new model of building core competencies. In addition, this third edition includes the following features: • Material on technology, social justice, cultural adaptation, sustainability, and facilitation techniques • An online instructor guide that offers activities, discussion questions, and assessments compiled from a group of acclaimed instructors • A digital field handbook that offers quick reference to key models, concepts, and checklists covered in the text • An expanded version of global perspectives, valuable for long-standing programs as well as those just beginning to enter the field Effective Leadership in Adventure Programming details both the art and science of adventure leadership, helping a new generation of outdoor leaders develop their skills. The text extends the focus on evidence-based models, theories, and best practices, showing that science and research are as important to the profession as the natural beauty of the environment. The book describes the core competencies of outdoor leadership, providing a framework that helps leaders connect with participants in meaningful ways, based on mutual goals. The focus on the science side is invaluable to new leaders and less-experienced leaders, and it is a great refresher for leaders with more experience. This new edition offers a more detailed look at diversity and cultural competencies, preparing leaders to effectively manage diverse populations of participants. In addition, the content is in line with the updated accreditation standards from the Association for Experiential Education. The opening chapters of Effective Leadership in Adventure Programming supply a solid foundation in the research, philosophy, ethics, and history of outdoor leadership. Numerous chapters explore the skills leaders need, with topics that include technical activity, safety and risk management, environment, organization, instruction, and facilitation. The authors also examine leadership styles and conditional leadership issues, communication, sound judgment, decision making, problem solving, and the trends and issues in adventure programming. Effective Leadership in Adventure Programming will help readers understand the four adventure program areas—recreation, education, development, and therapy—and how they influence the delivery of outdoor leadership. The book is a valuable resource for the training and education of future outdoor leaders. It will help readers know why they should work in the profession and

understand how they can make a difference by being an effective outdoor leader.
