Evangelical Theological Perspectives on Post-Vatican II Roman Catholicism

Leonardo De Chirico 2003 De Chirico (Istituto de Formazione Evangelica e Documentazione, Padova, Italy) begins by identifying the elastic contours of Evangelical theology in its contemporary outlook. Then he examines a number of Evangelical theologians who have interacted with Roman Catholicism in general and with Roman Catholic theology in particular over the past 40 sin Under the Moon Rowena Akinyemi 1992 The year is 2522, and the planet Earth is dying. In a colony under the moon, people wait for news - news from home, news of the planet Earth. And in a spaceship high above Earth, a young man watches numbers on a computer screen. The numbers tell a story, and the young man is afraid. The planet Earth is burning, burning burning...

The Children of Men P. D. James 2010-10-20 Told with P. D. James's trademark suspense, insightful characterization, and riveting storytelling, The Children of Men is a story of a world with no children and no future. The human race has become infertile, and the last generation to be born is now adult. Civilization itself is crumbling as suicide and despair become commonplace. Oxford historian Theodore Faron, apathetic toward a future without a future, spends most of his time reminiscing. Then he is approached by Julian, a bright, attractive woman who wants him to help get her an audience with his cousin, the powerful Warden of England. She and her band of unlikely revolutionaries may just awaken his desire to live . . . and they may also hold the key to survival for the human race.

Life of Pi Yann Martel 2009-03-19 Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe.

Speculative Everything Anthony Dunne 2013-12-06 How to use design as a tool to create not only things but ideas, to speculate about possible futures. Today designers often focus on making technology easy to use, sexy, and consumable. In Speculative Everything, Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas. For them, design

is a means of speculating about how things could be—to imagine possible futures. This is not the usual sort of predicting or forecasting, spotting trends and extrapolating; these kinds of predictions have been proven wrong, again and again. Instead, Dunne and Raby pose “what if” questions that are intended to open debate and discussion about the kind of future people want (and do not want). *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas, ideals, and approaches. Dunne and Raby cite examples from their own design and teaching and from other projects from fine art, design, architecture, cinema, and photography. They also draw on futurology, political theory, the philosophy of technology, and literary fiction. They show us, for example, ideas for a solar kitchen restaurant; a flypaper robotic clock; a menstruation machine; a cloud-seeding truck; a phantom-limb sensation recorder; and devices for food foraging that use the tools of synthetic biology. Dunne and Raby contend that if we speculate more—about everything—reality will become more malleable. The ideas freed by speculative design increase the odds of achieving desirable futures.

Open Access Peter Suber 2012-07-20 A concise introduction to the basics of open access, describing what it is (and isn't) and showing that it is easy, fast, inexpensive, legal, and beneficial. The Internet lets us share perfect copies of our work with a worldwide audience at virtually no cost. We take advantage of this revolutionary opportunity when we make our work "open access": digital, online, free of charge, and free of most copyright and licensing restrictions. Open access is made possible by the Internet and copyright-holder consent, and many authors, musicians, filmmakers, and other creators who depend on royalties are understandably unwilling to give their consent. But for 350 years, scholars have written peer-reviewed journal articles for impact, not for money, and are free to consent to open access without losing revenue. In this concise introduction, Peter Suber tells us what open access is and isn't, how it benefits authors and readers of research, how we pay for it, how it avoids copyright problems, how it has moved from the periphery to the mainstream, and what its future may hold. Distilling a decade of Suber's influential writing and thinking about open access, this is the indispensable book on the subject for researchers, librarians, administrators, funders, publishers, and policy makers.

A Month of Sundays John Updike 2012-03-13 In this antic riff on Hawthorne's *Scarlet Letter*, the Reverend Tom Marshfield, a latter-day Arthur Dimmesdale, is sent west from his Midwestern parish in sexual disgrace. At a desert retreat dedicated to rest, recreation, and spiritual renewal, this fortyish serial fornicator is required to keep a journal whose thirty-one weekly entries constitute the book you now hold in your hand. In his wonderfully overwrought style he lays bare his soul and his past—his marriage to the daughter of his ethics professor, his affair with his organist, his antipathetic conversations with his senile father and his bisexual curate, his golf scores, his poker hands, his Biblical exegeses, and his smoldering desire for the directress of the retreat, the impregnable Ms. Prynne. A testament for our times.

Cloud Cuckoo Land (Large Print Edition) Anthony Doerr 2021-09-28 From the
Pulitzer Prize–winning author of *All the Light We Cannot See*, perhaps the most
bestselling and beloved literary fiction of our time, comes a triumph of
imagination and compassion, a soaring novel about children on the cusp of
adulthood in a broken world, who find resilience, hope, and story. The heroes of
Cloud Cuckoo Land are trying to figure out the world around them: Anna and
Omeir, on opposite sides of the formidable city walls during the 1453 siege of
Constantinople; teenage idealist Seymour in an attack on a public library in
present day Idaho; and Konstance, on an interstellar ship bound for an
exoplanet, decades from now. Like Marie-Laure and Werner in *All the Light We
Cannot See*, Anna, Omeir, Seymour, and Konstance are dreamers and outsiders
who find resourcefulness and hope in the midst of peril. An ancient text—the
story of Aethon, who longs to be turned into a bird so that he can fly to a utopian
paradise in the sky—provides solace and mystery to these unforgettable
characters. Doerr has created a tapestry of times and places that reflects our
vast interconnectedness—with other species, with each other, with those who
lived before us and those who will be here after we're gone. Dedicated to “the
librarians then, now, and in the years to come,” *Cloud Cuckoo Land* is a
hauntingly beautiful and redemptive novel about stewardship—of the book, of
the Earth, of the human heart.
